ARE YOU LOOKING TO EXPAND YOUR BUSINESS INTO ELECTRIC VEHICLE REPAIR?

It is no secret that the automotive industry is going electric. Is your shop ready to service hybrid and electric vehicles?

PRODUCT HIGHLIGHTS

- Complete diagnostics of Electric Vehicles through the conventional OBDII port
- Complete diagnosis of the Battery Maintenance System (BMS) via direct testing of the High Voltage (HV) battery.
- Recalibrate the HV battery's State of Charge (SoC) and State of Health (SoH) to regain battery range and help extend the battery life of the customer's vehicle.
- Diagnose charging faults/failures

AUTEL MAXICHARGER

Install an Autel MaxiCharger Level 2 50 Amp commercial charger in your shop to maintain battery charge during diagnoses and return the vehicle to the customer with a full charge.
